Leibniz  
Association

## THE SPONSORING ASSOCIATION OF THE LIV

” **The Leibniz Institute of Virology investigates the biology of human pathogenic viruses. It is our aim to unravel the molecular mechanisms that control viral life cycles and virus induced pathogenesis. This research will provide novel targets and therapeutic approaches for established and emerging viral disease.** (The Institute's mission statement) “

Through its research, the **Leibniz Institute of Virology** covers the globally most important pathogens that cause most infectious diseases worldwide. On the basis of basic experimental research, the LIV is working on new starting points for improved therapeutic procedures that will enable timely treatment options for viral diseases such as AIDS, influenza and hepatitis, as well as emerging viral infections.

As a member of the Leibniz Association, the Institute is increasingly dependent on third-party funding and donations in addition to state and federal funding.

Friends of the LIV has set itself the goal of supporting research at the LIV where it can directly help sick people.

**By becoming a member of the non-profit association Friends of the LIV, you can make a personal contribution to the fight against infectious diseases and support the necessary research at the Leibniz Institute of Virology.**

## SUPPORT OUR RESEARCH!

Basic biomedical research is cost-intensive and financial resources are limited. Therefore, we are dependent on funding. In addition to basic funding from the federal government (Federal Ministry of Health) and the state (Hamburg's Ministry of Science and Research), the Leibniz Institute of Virology attracts third-party funding from the EU, the public sector, the German Research Foundation (DFG) and from various foundations.

**Please support our research for improved therapies and against infectious diseases. Your donation is in good hands!**

### I SUPPORT THE LIV

- with a one-time donation of € \_\_\_\_\_
- with an annual donation of € \_\_\_\_\_
- as Friends of LIV member with a minimum annual contribution of:
  - as association member 25,- €
  - as premium member 100,- €
  - as member in training 10,- €
  - as company 200,- €

Place, Date

Signature

### OUR BANK DETAILS

Förderverein des Leibniz-Instituts für Virologie e.V.

**Hamburger Sparkasse**

**IBAN: DE12 2005 0550 1001 2167 44**

You will of course receive a donation receipt upon request! (see reverse side)
